TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python
Frontend: HTML5, CSS3, React.js
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Tools: Git, GitHub, Postman
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, DBMS
Soft Skills: Problem Solving, Time Management, Leadership, Adaptability

TRAINING

Geeks for Geeks (Edtech Company) Jun' 24 – Jul' 24

- Data Structure and Algorithms
- Gained hands-on experience in **Data Structures and Algorithms using Java**, including **Arrays, Linked Lists, Trees, HashMap, Recursion, Searching, and Sorting** techniques
 - Experience solving **algorithmic and coding problems** with focus on **time complexity optimization**, debugging, edge-case handling, and logical **problem-solving**.
 - Developed a **Java-based Online Banking System** using **Object-Oriented Programming** concepts with features for account management, transactions, deposits, withdrawals, and balance.

PROJECTS

JobSheild AI | [GitHub](#) Oct' 25

- Designed an AI-powered job fraud detection platform using MERN stack and Machine Learning techniques to identify fake job and internship postings with real-time risk analysis.
 - Built and trained an NLP-based classification model using TF-IDF vectorization and Logistic Regression to detect fraudulent job descriptions with fraud probability scoring and red-flag analysis.
 - Integrated Flask AI microservice with Node.js backend, implemented JWT authentication, analysis history tracking, REST APIs, and responsive dashboard with secure input validation and role-based access control.
- Technologies:** Python, Flask, Scikit-learn, React.js, Node.js, Express.js, MongoDB, NLP, TF-IDF

AI Code Reviewer | [GitHub](#) Mar' 26

- Built a **microservices-based AI code review** platform with services for **authentication**, reviews, workspaces, notifications, GitHub integration, and review history management.
 - Implemented **GitHub pull request review**, repository file browsing, re-review comparison, and workspace-based collaboration with role-based access control.
 - Utilized **RabbitMQ** for **asynchronous job processing** and **Docker-based deployment** for scalable service orchestration and backend communication.
- Technologies:** React.js, Node.js, Express.js, MongoDB, JWT Authentication, Docker, GitHub OAuth, Grok AI API

Complaint Management System | [GitHub](#) Apr' 25

- Developed a MERN-based complaint management system with **JWT authentication**, complaint tracking, resident management, **role-based access control (RBAC)**, and an admin analytics dashboard.
 - Integrated **Stripe payments**, **Twilio WhatsApp notifications**, and secure webhook handling for rent payment workflows.
 - Configured **Docker**, **Jenkins CI/CD pipeline**, **rate limiting**, file uploads, and protected **REST APIs** for deployment and security.
- Technologies:** MongoDB, Express.js, React.js, Node.js, JWT, Docker, GitHub Actions, Twilio API, Stripe

CERTIFICATIONS

Full Stack Web Development | [Apna College](#) Jan' 25
Data Structure and Algorithms | [Apna College](#) Jul' 24
Server-Side JavaScript | [Coursera](#) May' 24

ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms problems across diverse platforms improving problem-solving and debugging skills.
- Coordinated and Hosted public speaking seminars through Converse+ Club with participation from 100+ students.

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Nov' 22 – Jul' 26
Computer Science and Engineering; CGPA: 7.6
Little Flower House Varanasi, Uttar Pradesh
Intermediate Apr' 20 – May' 21
PCM; Percentage: 80.75%
Happy Model School Varanasi, Uttar Pradesh
Matriculation Apr' 17 – May' 18
Percentage: 84.55%
